

A **practical guide** to the world of digital trust, electronic signatures, digital identity and legislation.

A **meeting of representatives from the world of business, legislation and IT** who will present their views on the topic of digital trust, electronic signature and electronic identity.

Key topics

- European Identity, eIDAS 2 and wallet in practice
- Remote electronic signature
- Electronic signature for B2B, B2C and B2E
- Qualified archiving and preservation

One topic, many points of view

Legislation vs. technical solution of electronic signature

Challenges, benefits and legal risks of electronic signing. How does e-signature relate to legislation and how can the requirements be technically fulfilled?

eIDAS 2 - European view vs Czech perspective

Digital trust in the European context, its future and what impact it will have on the Czech Republic.

Is it an opportunity for development or an obstacle?

Practical solutions in action

Case studies and experiences with implementation of electronic signatures from perspective of customers and IT experts. What to watch out for and how others have dealt with the obstacles?

Electronic identity

E-identity as one of the main topics of digitalization of business processes. What is its future in the context of eIDAS 2?

Discussion topics

Business and legislative view (main stage)

- eIDAS2 and impact on organisations
- European and national legislation
- Digitalisation concepts
- Case studies

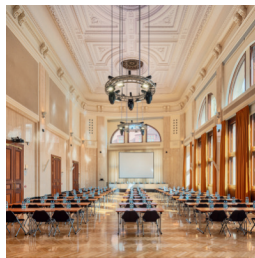

Expert panel discussion (main stage)

A moderated discussion of experts on the topics of the conference. Sharing of practical experiences with the implementation of eSignature and eIDAS-based digitalisation in practice.

Professionals for professionals (technology stage)

- aimed at technical experts and implementers
- partner solutions
